Professional Summary

Motivated Software Engineering student with a strong interest in backend development and full-stack web applications. Experienced in Java, Spring Boot, Python, React, PostgreSQL, and REST API development through academic and personal projects. Skilled in software design patterns, database design, and problem solving. Seeking internship opportunities to contribute to real-world software products while expanding technical expertise.

Education

BS Software Engineering, Sir Syed University of Engineering and Technology (2024 – Present)
CGPA: 3.86 / 4.00

Technical Skills

Languages: Java, Python, HTML, CSS
Frontend: Tailwind CSS, JavaFX
Backend: Spring Boot, Flask, REST APIs
Databases: PostgreSQL, MySQL, SQLite, MongoDB
Tools: Git, GitHub, VS Code, IntelliJ IDEA, Figma, ProjectLibre
Concepts: OOP, Data Structures, Algorithms, Software Design Patterns, Database Design, Software Architecture

Projects

Ouro – Online Auction House System

Tech Stack: Java, Spring Boot, React, Tailwind CSS, PostgreSQL

- Developing a multi-role full-stack auction platform supporting English, Dutch, Silent, Flash, and Reserve auctions.
- Designing REST APIs and integrating PostgreSQL database architecture.
- Implementing software design patterns including Singleton, Factory, Observer, Strategy, Decorator, Builder, and Command.
- Building role-based dashboards and auction management features.

Archon – AI-Powered Gaming PC Recommender

Tech Stack: Java, Spring Boot

- Developed backend services for recommending PC builds based on budget and user preferences.
- Designed recommendation logic and API endpoints for hardware selection.

ClipTalk – Peer-to-Peer Chat Application

Tech Stack: Java Sockets, JavaFX, CSS

- Built a real-time chat application using peer-to-peer communication.
- Developed a responsive desktop interface using JavaFX.
- Awarded 3rd Place at the SED Semester Project Exhibition Spring 2025.

Azura Bites – Food Ordering Website

Tech Stack: Python, Flask, HTML, CSS

- Developed a web application for food ordering and order management.
- Implemented routing, session management, and responsive user interfaces.

Certificates & Awards

- CodeAlpha Virtual Internship Program – [Java Programming](#) (May 2026)
- DataCrumbs No-Code [Web Development Masterclass](#) (July 2025)
- Java (Basic) – [HackerRank](#)
- 3rd Place – [SED Semester Project Exhibition Spring 2025](#) (January 2026)
